Dan Tayari

Full Stack Developer with a Creative Edge

Passionate about building and refining full-stack applications, landing pages, and interactive games using JavaScript, C++, and modern web technologies. Known for a detail-oriented mindset, strong collaboration skills, and a drive to continuously learn and improve. I bring the same dedication to every project—whether coding, designing, or solving complex problems—as I do to producing music and other creative pursuits.

EDUCATION

Computer Science degree
The Open University of Israel - Signed for next semester

Full Stack Developer Bootcamp
Coding Academy - MisterBit

11/2024 - 04/2025

WORK EXPERIENCE

Full Stack Developer
FluentAI

11/2024 - Present

FluentAI is a Google Chrome extension that helps people learn new languages, using AI subtitle translation.

Achievements/Tasks

- Developed a more efficient and secure backend authorization flow, improving performance and reducing unnecessary database queries.
- Diagnosed and resolved critical bugs across both frontend and backend, ensuring system stability and smoother user experiences.
- Built and implemented new frontend features requiring full-stack integration, including designing backend services and writing business logic
- Designed and created new database tables and schemas to support evolving product requirements and enhance data handling capabilities.

SKILLS

TypeScript · React · Angular · Vue · Next.js · CSS/Tailwind · MongoDB · Prisma · Vercel · Intermidiate C++ · OrbStack · Docker · Javascript · Team Worker/Cooperative

PERSONAL PROJECTS

Musify (02/2025 - Present)
- Built a responsive spotify clone, using React and vanilla scss.
- https://musify-tcob.onrender.com/

Tayari synth (01/2025 - Present)
- A synthisizer built with React, Tone.js and Next.js.
- https://tayari-synth-git-main-exitiumverums-projects.vercel.app/

Eat The Balls (12/2024 - Present)
- A simple game created with vanilla Css and Javascript.
- https://eat-the-balls.vercel.app/

Snake game (08/2024 - Present)
- Snake game written with C++.
- https://github.com/Exitiumverum/Snake-in-c-

CERTIFICATES

Full Stack Developer Certificate - Issued by Coding Academy (11/2024 - 04/2025)
